August 30, 2017

Janice and Colleen,

I have read through the FOIA request with our Division Director, Dr. Dale Hoff, and we have determined that we have a study that meets the requirements of the Request EPA-HQ-2017-009773. We do not have any internal reports, but the summary of the data from this study went into the following publication:

Cavallin, J., et al. 2016. **Pathway-based approaches for assessment of real-time exposure to an estrogenic wastewater treatment plant effluent on fathead minnow reproduction.**

<https://www.environmental-expert.com/articles/pathway-based-approaches-for-assessment-of-real-time-exposure-to-an-estrogenic-wastewater-treatment--598959>

These data were entered into Science Hub with the publication (available to the public), and can be found in the Dataset section. The Dataset was updated on 09/16/2016 and was successfully published on the Environmental Dataset Gateway (EDG). The title of the Dataset is "***Effect of exposure to wastewater treatment plant effluent on fathead minnow reproduction.***"

Please let us know that you have received this information and that it is acceptable for this FOIA request.

Barbara Sheedy, FOIA Coordinator  
&  
Dr. Dale Hoff, Division Director
